

TIME CODE CONVERTER INTERFACE

IF 480 WT

Interfaces are time code converters for a variety of different input and output signals. Their small outlines make them easy to mount even in restricted areas.

GENERAL DESCRIPTION

The IF 480 WT is an adapter for the time synchronization of any DCF 77 device compatible with MOBALine. With an ETC as master clock, it also allows for the easy realization of analog or digital world time clocks with up to 20 different time zones.

	IF 480 WT
Input	MOBALine
Output	DCF 77 time code (current loop or open collector)
Dimensions	55 x 40 x 12mm
